*Cord Management for
Temporary Installations*

Polyken™ 757T Tunnel Tape

is the industry-standard solution for managing cords, cables, and wires in high-traffic areas such as arts, entertainment, and convention spaces.

Designed with a non-adhesive center strip, this specialized tape creates a nonstick "tunnel" that securely holds down cables without adhering to them—ensuring clean removal and preserving wire integrity. **Cords and cables can be pulled completely through without lifting or shifting 757T.** The tape stays locked in place while the cord remains adjustable, saving time and keeping setups clean.

The tape's high-tack outer edges provide strong adhesion to a variety of floor surfaces, significantly reducing trip hazards and maintaining a polished, clutter-free appearance for events, productions, and exhibits.

Standard Sizes

72mm x 55M
96mm x 55M
6" x 60YD
